

1. Here is a short checklist concerning this years exercise sheets.

- To be able to take the exam at the end of the semester, you will have to collect 60 or more out of 100 points for exercises.
- On each exercise sheet, the first two exercises will reward 10 points total. Additional exercises do not contribute to your final point score but are specifically meant for exam preparation and additional practice.
- Hand in physical copies of your solutions for exercises 1 and 2 at the beginning of the practice session (Friday, 12-14) with the date given by the due date on the exercise sheet.
  - Hand in solutions in groups of 3 to 4 people ideally.
  - State clearly the name and student id of every group member on every sheet you hand in.
  - Staple your sheets or risk losing points.
- To ask questions about problems on the current exercise sheet, please visit the tutorial sessions - final time slot pending.
- On Friday's practice, we will present solutions to the past exercise sheet plus some additional information or content now and then.
